**Postmaster**, please send Form 3579 to PO Box 447, Southport, CT 06890

**On the Cover.** 9HA installation at GE's full-speed and full-load validation test facility in Greenville, *page 14*

**4 Intro to simple cycle specs**

What you should know about simple cycle ISO ratings and how to adjust them to match site and operating conditions

**8 Simple cycle power plants**

Customized OEM design ratings for production gas turbines available for 50/60-Hz power, cogeneration and CHP

**22 Intro to combined cycle specs**

What you should know about combined cycle ISO ratings and how to adjust them to match site and operating conditions

**26 Combined cycle power plants**

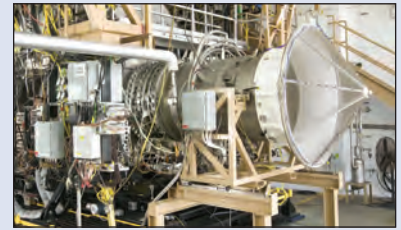

Customized OEM design ratings for 1x1 and 2x1 combined cycle plants available for 50/60-Hz electric power and CHP

**38 Mechanical drive gas turbines**

Customized OEM design ratings for production engines available for petrochemical process and oil & gas pipeline projects

**46 Marine propulsion gas turbines**

Customized OEM design ratings for production marine engines available for naval and commercial craft propulsion and power

**Simple Cycle**

Aero FT4000 gas turbine plant with wet compression is rated at 70MW and 41.3% efficiency for 50/60-Hz power generation, *page 19*

**Combined Cycle**

SCC6-5000F 2x1 combined cycle plant is rated at 720MW net plant output and 58.0% efficiency for 60-Hz power generation, *page 37*

**Mechanical Drive**

Titan 250 gas turbine engine is rated at 30,000hp continuous, 40.0% efficiency and 7000 rpm output coupling speed, *page 43*

**Marine Propulsion**

Each of two LM2000+G4 gas turbines powering this 50 knots+ ferry is rated at 47,370hp continuous and 39.5% efficiency, *page 47*

Gas Turbine World (USPS 944760, ISSN 0746-4134) is published bimonthly in addition to the GTW Handbook annual by Pequot Publishing Inc. 654 Hillside Rd., Fairfield, CT 06824. Canada Post International Mail Product (Canadian Distribution) Sales Agreement No. 0747165. Printed in U.S.A.
