Project Applications

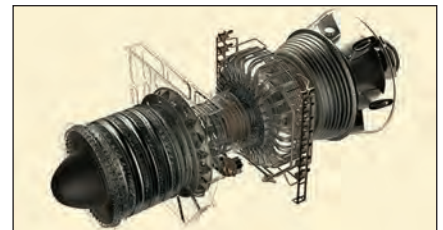

Offshore SC genset

Oil and gas FPSO vessel offshore Brazil powered by a Siemens SGT-A30 RB (Industrial RB211) genset rated at 32 MW with 37.5% efficiency, *page 16*

Grand River CC plant

Energy Center in Oklahoma powered by a 1x1 Mitsubishi M501J combined cycle plant rated at 484 MW net base load output and 62.0% net efficiency, *page 34*

LNG mechanical drive

New LM9000 introduced by GE Oil & Gas for LNG applications is rated at 95 MW and 43% efficiency, has a nominal speed of 3,429 rpm and 70% to 105% speed range, *page 40*

U.S. Navy destroyer

John Flinn (DDG 113) destroyer on sea trials, powered by General Electric LM2500+G4 marine gas turbines rated at 47,370 shp and 39.5% efficiency, *page 46*
