

## Research Partners

**Gas Turbine World:** Since 1970, Gas Turbine World has combined technical depth and real-world context to provide actionable information for the executive management, marketing and engineering segments of the gas turbine industry. GTW is internationally known for its in-depth coverage of new engine designs and performance analysis, advanced and emerging technologies, gas turbine plant pricing and OEM design specifications. Contact Victor deBiasi at 203-259-1812 or email [vdebiasi@gasturbineworld.com](mailto:vdebiasi@gasturbineworld.com).

**Dora Partners:** Dora Partners is an international consulting firm that specializes in industrial gas turbine product planning and marketing studies, business development, engineering and project management. For over 40 years, Dora has been providing engineering and consulting services to nearly all major OEMs including General Electric, Siemens, Pratt & Whitney, Rolls-Royce and associated product/service suppliers. Contact Anthony Brough at 866-322-7481 or email [abrough@dorapartners.com](mailto:abrough@dorapartners.com).

**McCoy Power Reports:** Since 1980, McCoy has worked with all major OEMs of gas turbines, steam turbines, boilers, heat recovery steam generators, hydro turbines, and engineering firms to document granular level order flow data for each power project at the point of project capital formation. Because of McCoy's documentation methodologies and its deep relationship with the OEMs, McCoy data is considered the leading source for analyzing power project trends. Contact David Hetherington at 804-677-8900 or email [davidh@mccoypower.net](mailto:davidh@mccoypower.net).
